Here's what's in this release (December 12, 2017)

Documentation Changes

In this release, we made the following changes to the way your providers handle documentation:

- **SOAP Notes Narrative > Objective > Removing Ortho/Neuro ignored:** Removing a test via the red "X" no longer states that the test is "Normal". Instead the test is not mention in that note.
- **SOAP Notes Narrative includes Visit Number:** Any Notes associated with a Care Plan now includes an indication of the visit number relative to the number of planned visits (X of Y):
