

See What's New from PayDC!

Here's what's in this release (July 10, 2018)

Improvements to SOAP Notes

The following changes were made to the SOAP Notes:

- Cleaned up the narrative text for History of Present Illness. To make the narrative read smoother, we removed references to "Patient stated", "Patient reported", etc. We also removed some redundant text and spaces.
- SOAP Notes > Subjective > History: When importing from the patient questionnaire, the Accident Occurred Time was being offset by four hours. This has now been fixed.
- Subsequent notes for SOAP Note Narrative were repeating patient history every time. This has now been fixed.
- SOAP Note > Review of Systems (ROS): Data is now pulling from the patient questionnaire.
- Some SOAP Notes were missing symptoms in the Subjective section the first time the narrative was generated.

Support Items

In addition, we have added fixes to the following support items:

- Billing: auto-posting insurance payments were not being posted due to the lack of a balance.
- The Patient Questionnaire for new patients was not saving properly.

Thank you!
