Functional Enhancements

- ✓ Notes: Provide ability to capture signature from a second performing provider
- ✓ Notes: Additional areas added for review of systems

NOTE: Details Regarding These Functional Enhancements Are Provided Below

Functional Enhancement Details

Notes: Capturing the signature for a second performing provider

When a second provider is performing procedures and both signatures are needed on the notes/narratives, check the “Incident to Signature box”. The performing provider will enter their PIN and then “Save without Sign”.

The screenshot displays the 'SOAP Notes - Ayers, Sammi NP' interface. A 'New SOAP-Note' window is open, showing patient information and a list of notes. A 'Provider Signature' dialog box is overlaid on the main window. The dialog box contains the following fields and options:

- Select your name and date to sign the Note**
- Signature:** Pro PayDC, DC
- Authorization PIN:** [Empty field]
- Date:** 6/25/2014 12:27 AM
- ☒ **Incident to Signature**
- Performing Provider Signature:** Dave Klein, DC
- Authorization PIN:** [Empty field]
- Performing Provider Signed Date:** 6/25/2014 12:22 AM
- ☒ **Patient received care without incident**
- ☒ **Injection site prepped with Chlorhexidine, Needle removed and tip intact**
- Turbo Save and Sign** (button)
- Save and Sign** (button)
- Save without Sign** (button)
- Cancel** (button)

After the primary provider reviews the Note, they will enter their PIN and “Save and Sign” to finalize it.

This is a close-up of the 'Provider Signature' dialog box. It contains the same fields and options as the previous screenshot, but with the following differences:

- Signature:** Pro PayDC, DC
- Authorization PIN:** [Empty field]
- Date:** 6/25/2014 12:35 AM
- ☒ **Incident to Signature**
- Performing Provider Signature:** Dave Klein, DC
- Authorization PIN:** [Empty field]
- Performing Provider Signed Date:** 6/25/2014 12:22 AM
- ☒ **Patient received care without incident**
- ☒ **Injection site prepped with Chlorhexidine, Needle removed and tip intact**
- Turbo Save and Sign** (button)
- Save and Sign** (button)
- Save without Sign** (button)
- Cancel** (button)

After the primary provider has signed, both signatures will appear on the Note:

Assessment:
Phase of care: Passive or Acute
1. Cervicalgia (723.1)
Patient is progressing as anticipated. Intensity is un-changed.

Plan:
Based on subjective and objective data today's treatment consisted of:
