Latest Features and Update (December 14, 2015)

Enhancements and support

Here's what's in this release (December 14, 2015)

Enhancements

- Meaningful Use functionality (including dashboard) has been updated to reflect 2015 Modified Stage 2 requirements. Meaningful Use clients will receive a separate communication on these changes by the end of the year.
- We've added the following fields to our paper information forms:
 - Driver's license number and state
 - Date of accident
 - Relationship of emergency contact to patient.
 - Date of Accident
 - Patient e-mail address
 - Attorney Name & contact info (on page 2 after the Auto/liability insurance)
 - Health insurance number
 - Group Id
- Narratives
 - We've improved our narrative's handling of single-vehicle auto accidents by adding a checkbox (in Patient Demographics, SOAP notes and Patient Portal) by "Other Vehicle" for "N/A", and updating the narrative to match.
 - We have updated our narratives to display patient name and date of birth in the document header on every page.
- Wellness
 - We have streamlined Wellness care plans and quick charge entry by only showing diagnostic codes the user has selected to include for Wellness.
 - We have also ensured that procedure codes are autopopulated correctly when a user creates a wellness care plan and adds notes.
- We have now added the ability to multi-select ICD-10 equivalents in care plans, notes and claims.
- We've improved consistency in the PayDC/APS platform by ensuring that when a user changes diagnosis codes during creation of a note from a care plan, the user is prompted on whether the care plan should be updated to include those updates to the codes.

- At the request of a client, we have added the following modifiers:
 - KH for CPT E0730 & E0855
 - KI for CPT E0730 & E0855
 - N4 for CPT J3490
 - CG to any DME (durable medical equipment)

Support:

- We've corrected an issue where Date of Onset is correctly captured but is displayed incorrectly due to the difference between a user's time zone and UTC. We are still addressing a similar issue with date of service, patient portal and care plan date, and anticipate deploying that fix in a future release.
- Macros:
 - We've addressed an issue where some users were getting a system crash when trying to create a new macro from the SOAP notes screen.
 - We've also made macros easier to use by allowing users to add from the Select screen, and to allow users to re-order macros and add macros from the Macro window.
 - We addressed an issue where if the user added an appointment note in the scheduler, the macros weren't being consistently saved.
- We have addressed several cosmetic issues with our patient statements.
- Other minor bug fixes

Thank you!
