

See What's New from PayDC!

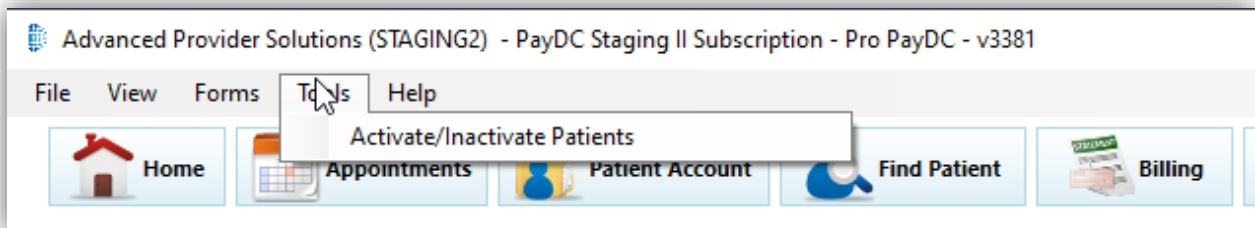

Here's what's in this Release (May 5, 2021)

Improvements:

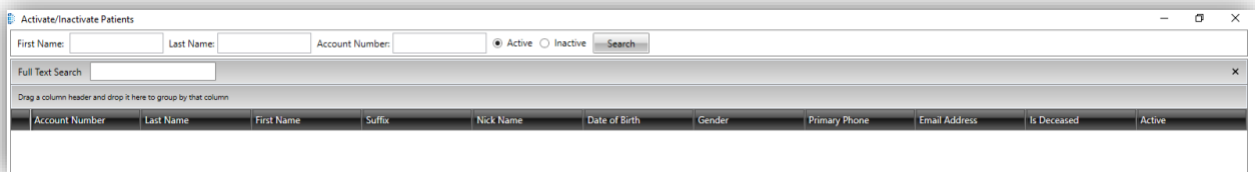

- **Application:** We have added identification of the logged-in user and software version number in the application title.

- **Patients:** We have added a new sub-menu to activate/in-activate patients under the 'Tools' tab.

This tool opens a new screen and displays the columns in a grid, similar to the Find Patients screen. Search for patients by First Name, Last Name, or Account Number, or use the Full Text Search for any part of the patient row. You can also group your search results by any column by simply dragging that column header to the top.

Use the radio button to show Active or Inactive Patients which includes an “Is Deceased” column. Select active patients and inactivate with “Deactivate Patients” button. Likewise, select inactive patients and activate with “Activate Patients” button. These changes will require a password.
